

# KHANTEX COTTON, LLC

## NEW GINNING FACILITY

### **THE CLIENT**

Khantex Cotton, LLC  
Andijan Region, Uzbekistan

### **THE PROBLEM**

A massive cotton-production initiative in the country of Uzbekistan created an urgent need for newer higher capacity ginning facilities, with the latest technology in the industry, for the cotton-farming “clusters” that were organized throughout the country.

### **THE SOLUTION**

An all-new 2/170-Saw Imperial III gin plant featuring two stages drying and single 96” wide precleaning, Super-Jet® and single Sentinel™ II lint cleaning, and related items was constructed in 2018 and commissioned in 2019 in the Fergana Valley,

The ginnery is one of the first of its kind in the country, and it features proven Lummus technology throughout.
